Subject: HPP list updates
Attachments: Energy Projects 6-14.docx Federal Projects 06-14.docx Transp Projects 06-14.docx Mining Projects 06-14.docx

Hi Sara,

Our updates are attached. I included the Federal Management Plans list but at the last meeting it sounded as if this list may be dropped entirely.

If you have any questions, please let me know. Thanks!

OIL AND GAS/ENERGY PROJECTS

Description & Link	Schedule	Federal	State
--------------------	----------	---------	-------

Project Title: Point Thomson

Lead Federal Agency: COE

Responsible Person: (1) State Lead: Sara Longan, (2) DEC Lead: Gary Mendivil, (3) Lori Aldridge, (4) EPA Lead: Gayle Martin (404)

ExxonMobil proposal to produce oil, gas and hydrocarbon condensate from the Point Thomson Sand Reservoir and delineate other hydrocarbon resources in the Point Thomson area.	<p>FEIS issued Aug 2012. COE issued ROD and 404 permit on October 26, 2012.</p> <p>Project construction is ongoing. The permanent fuel storage tanks have been installed. The airstrip is fully operational.</p> <p>The ice road from Endicott to Point Thomson has been constructed and installation of the export pipeline will begin soon.</p>		<p>State comp held v</p> <p>OPM agenc site v</p>

OIL AND GAS/ENERGY PROJECTS

Description & Link	Schedule	Federal	State
--------------------	----------	---------	-------

Project Title: Alaska LNG Project
Lead Federal Agency: FERC
Responsible Person: (1) DEC Lead: Gary Mendivil, (2) Tim Spires (SW), (3) DNR Lead: Jodi Delgado-Plikat (SPCO), (4) EPA Lead: Mark Jen (PM/NEPA), (5) Gayle Martin (404), (6) Corps Lead: Mike Holley

The Federal Energy Regulatory Commission (FERC) is drafting an Environmental Impact Statement (EIS) for a project proposed by TransCanada / ExxonMobil that would connect Alaska’s vast natural gas resources with new markets. Deadline for FERC Certificate of Public Necessity and Convenience has been postponed for two years. The deadline for the EIS is 18 months later.	A new agreement has been negotiated between industry and the Parnell Administration, subject to amendment by the Alaska Legislature. --------------------	----------	---------	-------

Project Title: Susitna-Watana Hydroelectric Project

Lead Federal Agency: FERC

Responsible Person: (1) State Lead: Marie Steele, (2) DEC Lead: William Ashton, (3) ADFG Lead: Joe Klein (4) NMFS Lead: Susan Walker (Mandatory Conditioning Agency) (5) USFWS Lead: Catherine Berg (Mandatory Conditioning Agency) (6) EPA Lead: Matt LaCroix (404), (7) Jennifer Curtis (PM/NEPA) (8) Corps Lead: Jason Berkner

<p>The Susitna-Watana Hydro Dam installed capacity would be 600 MW with the average annual generation determined to be 2600 GWhrs (HDR 2009). The reservoir would be 42 miles long and a maximum of 2 miles wide. Current dam height anticipated to be 735'. The project proponent is Alaska Energy Authority (AEA) and OPMP is coordinating state agency involvement. Governor Sean Parnell has publicly endorsed the project.</p> <p>http://susitna-watanahydro.org/Description.html.</p>	<p>Due to impacts of Governor's FY15 budget, proponent asked for an extension on filing the Initial Study Report (ISR), which details the results of the first season of study and plans for the second season. FERC granted the delayed filing and added an additional 120-day comment period. The sections of the ISR that are currently complete have been posted on the project website and were filed with FERC on 3 February 2014. To avoid confusion with the final ISR to be filed with FERC on 3 June 2014, the proponent has titled the incomplete ISR a "Draft ISR". It is important for stakeholders to recognize that these posted sections of the ISR are complete and ready for review, although no formal FERC comment period is currently open.</p> <p>Proponent is currently prioritizing critical activities for 2014 and plans to meet with state, federal and other stakeholders to prioritize activities for 2014.</p> <p>Proponent is working diligently to resolve land issues and hopes to have a resolution soon.</p> <p>New dates: Feb 2016: Updated Study Report (USR) Dec 2016: License application</p>	<p>EPA, COE and USDA-RUS are Cooperating Agencies on the FERC EIS.</p>	<p>Governor's budget as a indicator the current budget legis incre agre deve</p>

Project Title: Shell OCS Chukchi Sea

Lead Federal Agency: BOEM/BSEE

Responsible Person: (1) State Lead: Sara Longan, (2) DEC Lead: Gary Mendivil, (3) EPA Leads: Hanh Shaw and Erin Seyfried (WW), (4) Natasha Greaves (Air)

<p>Shell's revised Exploration Plan for 2012 drilling in the Chukchi Sea was submitted to BOEM in October 2011. Released for 21-day public comment period on EA along with Oil Discharge Prevention and Contingency Plan (ODPCP) in November. BOEM Conditionally Approved Shell's 2012 Exploration Plan for the Chukchi Sea, but placed additional conditions that shorten the time period for exploration and place additional restrictions on Shell's Incidental Take Authorizations.</p> <p>Shell scaled back drilling operations during the summer of 2012 due to a containment system failure. Shell drilled shallower, top-holes.</p> <p>Shell has suspended plans to drill in 2014.</p>	<p>Shell suspended plans for drilling in the summer of 2013. On Nov. 6, 2013 Shell submitted revised Chukchi Sea Exploration Plan to BOEM. BOEM requested additional information. Once "deemed submitted" BOEM has 30 days to make decision and conduct analysis.</p>	<p>NPDES Permit for Chukchi Sea oil and gas discharges issued in fall of 2012. EPA has reviewed Shell's preliminary Environmental Monitoring Program plan and anticipates receiving Notices of Intent requesting permit coverage at the Burger lease blocks.</p> <p>Shell voluntarily withdrew Arctic OCS air permits from EPA on November 6, 2013.</p> <p>EPA terminated the Shell Chukchi Air Permit on Dec. 26, 2013.</p> <p>EPA has declined cooperating agency status on the BOEM revised Shell Exploration Plan Environmental Assessment.</p>	<p>The S Coop review</p>

Project Title: Apache 3-D Seismic

Lead Federal Agency: FWS

Responsible Person: (1) State Lead: Sara Taylor, (2) DEC Lead: Gary Mendivil, (3) FWS Lead: Andy Loranger, (4) NMFS Lead: Brad Smith, (5) Corps Lead: TBD

<p>Advanced 3D seismic imaging of lease holdings in the Cook Inlet area, including offshore state leases and CIRI subsurface inholdings in the Kenai National Wildlife Refuge (KNWR).</p> <p>Special Use Permit issued for work in KNWR in mid-July 2013. Permit is good until 2016 with option to renew for two additional years.</p> <p>Survey set to commence Feb 2014 and run through April 2014 on Tyonek Native Corporation lands within the refuge and offshore to the north. Initial planned area for seismic survey has been scaled down to target areas with high potential.</p>	<p>Environmental Assessment regarding a proposed five-year special use permit to authorize seismic operations on certain Refuge lands; final EA issued and FONSI signed July 2013, followed by Special Use Permit. Amended FONSI and Supplemental EA in development to cover expected project changes.</p> <p>Compatibility Determination for activities on Tyonek lands within the Refuge related to marine support issued April 11, 2013. Work to be governed by Special Use Permit, with some exceptions.</p> <p>Section 106 consultation finalized.</p>	<p>IHA 1 issued 4/30/12 in litigation over Biological Opinion; on appeal to Ninth Circuit. IHA 2 for 3/1/13 to 3/1/14 issued February 2013. IHA 3 for 3/1/14 to 3/1/15 issued March 2014.</p> <p>Four NW6 permits issued (one each in Aug, Sept, Oct, 2012, and one for NW peninsula shoreline in May 2013). Work on KNWR is non-notifying; Apache applied for permit or "official OK" anyway, letter from FWS HistPres/Arch sent to ACOE early June 2013.</p> <p>Two Section 10 permits issued (one each in May, Oct 2012); one outstanding application submitted 10/16/12 for waters north of the peninsula.</p>	<p>Division of Conservation Land use permit.</p> <p>Division of Conservation Land use permit. Capt Cook Sound and Kenai River Area (KRSMA) submitted 10/16/12 issued in April 2013. decision delayed request, may be one-year barring any operation.</p> <p>No TWUPS operation.</p>

--------------------	----------	---------	-------

Project Title: NMFS/BOEM Effects of Oil and Gas Activities in the Arctic Ocean EIS

Lead Federal Agency:

Responsible Person: (1) State Lead: Sara Longan, (2) DEC Lead: Gary Mendivil, (3) EPA Lead: Jennifer Curtis (NEPA)

<p>On March 21, 2013, NOAA and the Bureau of Ocean Energy Management (BOEM) announced the release of the Supplemental Draft Environmental Impact Statement (EIS) for the Effects of Oil and Gas Activities in the Arctic Ocean, which analyzes how a broad range of potential offshore oil and gas activities in the Arctic could affect marine mammals, other resources, and Alaska Native communities.</p> <p>NOAA and BOEM's new analysis follows comments received from stakeholders after release of the initial draft EIS issued in December 2011. The original draft analyzed up to two exploratory drilling programs per year in both the Chukchi and Beaufort seas. The supplemental draft EIS analyzes the effects of up to four drilling programs per year in each area--providing an opportunity to assess potential individual and cumulative impacts.</p> <p>http://www.nmfs.noaa.gov/pr/permits/eis/arctic.htm</p>	<p>Draft Supplemental EIS public comment period closed June 27, 2013.</p> <p>NMFS is currently drafting preliminary FEIS for agency review in Feb 2014.</p>	<p>Earlier this year EPA responded to an Earthjustice FOIA involving the NMFS Arctic Draft SEIS.</p>	<p>State of Alaska questioning the process, since consulted during processes.</p> <p>NMFS recently preliminary draft State before it review.</p>

TRANSPORTATION PROJECTS

Description & Link	Schedule	Federal	State
--------------------	----------	---------	-------

Project Title: Northern Rail Extension

Lead Federal Agency: Surface Transportation Board

Responsible Person: (1) State Lead: Jeff Bruno, (2) EPA Lead: Matt LaCroix/Gayle Martin (404), (3) Corps Lead: Ellen Lyons

<p>This project involves the construction of a new 80-mile rail line from North Pole to Delta Junction. The federal Surface Transportation Board completed an environmental impact statement (EIS) in 2009 and issued a Record of Decision in January 2010. EPA expressed concerns re: the purpose and need. Phase I of the project includes the construction of a new bridge across the Tanana River. In December 2010 the EPA declared the Tanana River an Aquatic Resource of National Significance (ARNI) and concluded that the project does not comply with the Clean Water Act Section 404(b)(1) guidelines and would have "substantial and unacceptable adverse effects on the Tanana River." Under a memorandum of agreement with the Army Corp of Engineers, EPA exercised their right to review the permit, but agreed in early June 2011 to allow the permit to go forward.</p>	<p>Construction of Phase 1 has begun and they hope to begin Phase II in the next fiscal year. Limited resource agency involvement at this point. ARRC has announced that navigation in the bridge area is prohibited until April 2014.</p> <p>Delays with Section 9 Permit (approval from US Coast Guard (USCG) for bridge construction) across the Tanana River have the RR concerned about project schedule. The USCG has identified this as a "high priority" but it is unclear to what that means as far as timing with the section 9 permit and could possibly delay the schedule if not issued in the near future.</p>	<p>Numerous permit mods (small acreages) in recent months for 2-year bridge construction.</p>	<p>Northern Rail is segment 1 and the funding to has ask OPMP until they receive start on segment</p>

Project Title: Ambler Mining District Transportation Corridor

Lead Federal Agency: COE

Responsible Person: (1) State Lead: Marie Steele, (2) AIDEA Lead: Mark Davis, (3) DOT Lead: Ryan Andersen, (4) Corps Lead: Mary Romero (5) EPA Lead: Jennifer Curtis (NEPA), (6) Gayle Martin (404),

<p>The Ambler Mining District Access project will evaluate potential transportation corridors serving the Ambler Mining District. The purpose is to provide all season access for exploration and development of potential resources within this district. The work will include the evaluation of transportation modes such as roads, rail, barge and airport networks. The transportation corridor will also address critical infrastructure needs for the development of natural resources such as power generation and communications. Project proponent is AIDEA.</p> <p>Proposed funding for FY14: \$8.5M</p>	<p>Project currently in pre-application phase consulting with federal, state and local entities. Community meetings have been recently held on the eastern end of the corridor to update area residents on project status.</p>	<p>SF 299 pre-application meeting was held in April.</p> <p>Project will require a Corps 404/Section 10 permits and will trigger NEPA. Also requires that NPS and USDOT environmental and economic analysis (NEPA exempt for NPS) under ANILCA Title XI. Lead federal agency for EIS has not yet been determined.</p>	<p>Project is work and UAF on ba studies.</p>

--------------------	----------	---------	-------

Project Title: Juneau Access Road

Lead Federal Agency: COE

Responsible Person: (1) State Lead: Kyle Moselle, (2) DEC Lead: NA, (3) DOT Lead: Reuben Yost, (4) EPA Lead: Jennifer Curtis (NEPA), (5) Becky Fauver (404), (6) Corps Lead: Randy Vigil

On September 14, 2011 the Alaska Department of Transportation and Public Facilities (DOT&PF) announced that it will begin the process with the Federal Highway Administration (FHWA) to complete a supplemental Environmental Impact Statement (SEIS) for the Juneau Access Improvements project. The SEIS will fully evaluate a stand-alone alternative that improves service in Lynn Canal using existing AMHS assets. The supplemental EIS will also update the Final EIS reasonable alternatives and will address changes in applicable laws, regulations, and approvals. DOT&PF anticipates the SEIS process will take approximately two years, with a draft SEIS released in late 2012, a final SEIS released in mid 2013, and a new Record of Decision (ROD) approved later that year. DOT&PF has contracted with the firm HDR Alaska, Inc. to prepare the SEIS and many of the required supporting documents.	PDSEIS for Cooperating Agency review February 2014. DSEIS-2	EPA submitted comments on the PDSEIS to FHWA and ADOT on February 21, 2014.

		ocean disposal site(s) (Nome East and Nome West) under MPRSA, which is included as a categorical exclusion under EPA NEPA regulations.	

MINING PROJECTS

Description & Link	Schedule	Federal
--------------------	----------	---------

Project Title: Greens Creek Mine

Lead Federal Agency: USFS

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Kyle Moselle, (2) DEC Leads: Allan Nakanishi (WW), (3) Doug Buteyn (SW), (4) Tim Pilon (APDES), (5) DFG Lead: Kate Kanouse, (6) EPA Leads: Lynne Hood (NEPA), (7) Cindi Godsey (WW), (8) TBD (404), (9) Lorraine Edmond, (10) Corps Lead: Matthew Brody, (11) Hecla contacts: Chris Wallace (Env), (12) Scott Hartman (General Mgr), (13) USFS Lead: Sarah Samuelson

<p>The Greens Creek Mine is a silver-zinc-lead mine operated by Hecla Greens Creek Mining Company and located about 18 miles southwest of Juneau on Admiralty Island within a non-wilderness portion of the Admiralty Island National Monument. Based on known and anticipated ore reserves, the mine has a remaining life of approximately 22 years. The recent decision by the USFS for expansion of the tailings facility projects 10 years of capacity based on current production levels.</p>	<p>Bonding MOU with USFS and SOA being revised. Expected April 2014.</p> <p>In Jan 2014, USFS, SOA and Hecla reached agreement in principle on Financial Assurance (FA) amount (~\$100m) for reclamation and long-term care and maintenance activities for current disturbance and tailings expansion. Waste Mgmt Permit (WMP) public comment period expected to start April 2014. Reclamation Plan and FA amounts will be noticed with WMP.</p> <p>Expect public comment period on amended APDES in early 2014.</p> <p>Proponent plans to grub for tailings expansion fall 2014, start construction spring 2015, and complete construction fall 2016 (pending state and federal permits).</p>	<p>FEIS & Record of Decision (ROD) issued Sept 9, 2013. USFS chose a modified Alternative D (18 acre expansion of existing drystack w/ no diversion of Tributary Creek). The Corps will separate conduct 404(b)(1) analysis and wetland mitigation. SEACC and Kootznoowoo file an appeals on the ROD on Oct 28, 2013. ROD affirmed by Regional Forester Dec 2013.</p> <p>The Corps received a 404 permit application on Dec. 24, 2013. Corps issue Public Notice with 15-day extension (comments due May 23, 2014).</p> <p>EPA issued letter on Final EIS acknowledging issues being resolved with the exception of Financial Assurance (FA). Comments regarding the outstanding FA issue referred to resolution through our involvement in the review post-NEPA. USFS is currently engaging EPA in review and discussions regarding finalizing FA. EPA plans to participate in the first Financial Assurance analysis meeting with the Forest Service in June 2014.</p>

MINING PROJECTS

Description & Link	Schedule	Federal
--------------------	----------	---------

Project Title: Red Dog Zn-Pb

Lead Federal Agency: Corps

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Jack

DiMarchi, (2) DEC Leads: Tim Pilon, (3) Pete McGee, (4) DF&G Lead: Bill Morris, (5) DNR Lead:

Brent Martellero, (6) Corps Lead: Don Kuhle, (7) EPA Lead: Cindi Godsey (8) Teck Alaska:

Chris Eckert, (9) Chris Menefee (Env), (10) Henri Letient (Gen. Mgr)

One of AK's longest operating open pit mines and one of the world's largest zinc-lead deposits. The mine is located in northwestern Alaska, approximately 82 miles north of Kotzebue, and 46 miles inland from the coast of the Chukchi Sea. It has been operating continuously since its opening in 1989. In 2009 it received Federal and State approvals to expand into the Aqqaluk deposit.	<p>The mine is in the process of getting APDES permits for the mine water discharge and the port facility discharge.</p> <p>Mine raised main dam in 2013 and will again in 2014</p> <p>Next major action: Completion of environmental audit report (1Q 2014) and review/approval of new Reclamation & Closure Plan and Integrated Waste Management Permit – with new permits being issued in 1Q 2015.</p> <p>Ongoing Actions related to dam performance</p>	<p>The NPDES permit was appealed to the EPA's Environmental Appeals Board and was upheld.</p> <p>The Corps issued 404 permit for main dam raise in November 2013.</p> <p>In March, EPA received a petition from the Native Village of Kivalina to perform a Preliminary Assessment of the mine site, haul road and port facility to address outstanding tribal concerns. The Region is working to respond to the initial petition and as well as</p>	<p>Public Comment period for the APDES permit closed on Feb 3, 2014.</p> <p>State agencies are presently reviewing the draft environmental audit of the mine.</p> <p>In fall 2011, Dam Safety issued an NOV for design issues on the dam and the certificate to operate. A dam safety review panel released report in October 2012. The panel was a condition of the Dam Safety NOV. Currently the State is waiting for the technical report from the review panel. Company also performed Willowstick geophysical survey in attempt to identify seepage zones in subsurface – Report has been provided to State and is under review</p> <p>Mine staff met with LMPT team in Anchorage on Feb 4, 2014 to review the Willowstick survey results and be briefed on other dam related and water management related activities at the mine.</p>

--------------------	----------	---------

Project Title: Chuitna Coal Project Supplemental EIS

Lead Federal Agency: Corps

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Sara Taylor, (2) DEC Lead: Allan Nakanishi (WW), (3) DMLW Lead: Russ Kirkham, (4) DHSS Lead: Dr. Paul Anderson, (5) EPA Leads: Jamey Stoddard (WW), (6) Erik Peterson (NEPA), (7) Matt LaCroix (404), (8) Corps Leads: Heidi Firstencel, (9) Shane McCoy

<p>This proposed surface coal mine is located 45 miles west of Anchorage near Tyonek. The 300-million ton project would extract low sulfur sub-bituminous coal from the Beluga Coal Field. Project prediction is for a minimum 25-year life of the mine with a production rate of up to 12 million tons per year for export.</p> <p>The project was previously permitted in the 1990's, but not developed. Subsequent project changes have mandated a SEIS. The current NEPA/permitting process commenced in 2006 with EPA as the lead agency.</p> <p>In late 2010, the Corps assumed the lead agency role because the State assumed authority for NPDES (APDES) permitting for mining projects on Oct 31, 2010.</p> <p>Project has been the subject of multiple challenges; controversy surrounding potential removal of ~11 miles, with subsequent restoration, of a salmon stream (#2003) that is a tributary to the Chuit River. Superior Court ruled DNR must document how it considers Instream Flow Applications when making decisions on TWUP issuances.</p> <p>EPA, SOA, NMFS & NVT are Cooperating Agencies.</p> <p>www.chuitnaseis.com</p>	<p>No permits have been issued. Awaiting completed ASCMCRA permit applications.</p> <p>Federal permitting will begin once SEIS is completed. The Corps would like to complete the draft SEIS in September 2014.</p>	<p>The Corps is revisiting the purpose and need statement and may redefine it more broadly. The current purpose and need statement may be overly restrictive and may be preclud consideration of reasonable alternatives. Corps is developing a cost matrix template for mine design alternatives.</p> <p>The Corps continues to work through the Section 106 process with consulting parties. The Advisory Council on Historic Preservation has raised the question of whether the project area constitutes a Traditional Cultural Property, and has indicated that the broader cultural landscape may be of more central importance than the archaeological district.</p> <p>Site specific criteria scheduled for adoption by the end of 2014.</p> <p>Using an existing contract vehicle out of HQ, R10 has developed a task order for NatureServe to review the surface water baseline report, water management plan, groundwater model. The purpose is to determine if the characterization of streamflow in the reports is adequate for impacts analysis, and whether reported impacts and post-mining stream flow predictions are accurate and supported by data.</p> <p>On May 6, EPA Regional staff and management met with Cook InletKeeper to hear their concerns about the project.</p>

Project Title: Donlin Gold Project

Lead Federal Agency: Corps

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Jeff Bruno, (2) DEC Leads: Gary Mendivil; (3) Renee Evans (WW), (4) Lori Aldridge (SW), (5) ADFG Leads: Bill Morris, (6) Jim Simons, (7) Lee McKinley, (8) EPA Leads: Mark Jen (PM) and (404), (9) Cindi Godsey (WW), (10) Corps Lead: Don Kuhle

<p>The proposed Donlin Gold Mine is located near the Kuskokwim River Village of Crooked Creek in Southwest Alaska, approximately 120 miles upstream from Bethel. It is a large (on the order of 40 million ounces of gold), undeveloped refractory gold deposit on lands owned by the Kuskokwim Village Corporation (surface) and Calista Regional Corporation (subsurface). The proposal is for an open pit mine measuring two miles wide and one mile wide. Project proponent is Donlin Gold Inc., a partnership of Barrick Gold Corp and NovaGold, Inc. They plan to build a 300+ mile natural gas pipeline to provide power for the mine operations. The Kuskokwim Basin is a mercury province and there are nearby mercury ore deposits with a history of production (Red Devil).</p> <p>Project proponent submitted 404 permit application in 2012 which started the EIS process. This could be the 1st time a mining project proposes perpetual water treatment as an initial permitting component. Estimated startup capital costs for the project are \$6.7 billion, including \$834 million for the natural gas pipeline.</p>	<p>DEIS – Apr 2015 FEIS – May 2016 ROD – July 2016</p> <p>www.donlingoldeis.com</p>	<p>On April 23, EPA participated in data gaps analysis meeting and provided comments on April 23.</p>

Project Title: Pebble Cu-Au-Mo Project

Lead Federal Agency: Corps (likely)

Responsible Person: (1) State Lead: Large Mine Project Team; OPMP Coordinator: Jack DiMarchi, (2) DEC Leads: Allan Nakanishi (WW), (3) Lori Aldridge (SW), (4) EPA Leads: Rick Parkin (PM for BBWA), (5) Cindi Godsey (WW), (6) Heather Dean (404), (7) Corps Leads: Katie McCafferty, (8) Pebble Ltd. Partnership: Tim Havey

<p>Pebble Project is a very large copper-gold-molybdenum mineral deposit located 200 miles southwest of Anchorage on state land. It contains components that, if developed, would likely involve both a large open-pit surface mine and an underground block cave operation.</p>	<p>No permitting schedule presently – Project on care and maintenance status approximately seven years.</p>	<p>EPA is undergoing a process under Water Act 404(c) to identify options to protect the world's largest sockeye salmon fishery in Bristol Bay, Alaska. EPA released the final Bristol Bay Water</p>
--	---	--

MINING PROJECTS

Description & Link	Schedule	Federal
<p>The project was in an advanced state of exploration, but is now in care & maintenance status owing to departure of partner Anglo American who was funding the project as part of their earn-in agreement with owner Northern Dynasty Minerals.</p> <p>~27,000 pages of baseline study results for the time period 2004-2008 were previously released</p> <p>Proponent is the Pebble Limited Partnership (Anglo-American and Northern Dynasty). However, in September 2013 Anglo pulled out of the partnership. Northern Dynasty reduced staff in Anchorage and is seeking financial options.</p> <p>The project would require road access and a supply of power in addition to the project's mining footprint. Mine life could be 50-100 years, possibly more.</p> <p>The project is the focus of national attention/opposition. In response to a petition from nine tribal governments, EPA has initiated a watershed assessment of the Nushagak and Kvichak watersheds in Bristol Bay under the authority of Section 404(c) of the Clean Water Act.</p> <p>Rio Tinto has announced that it is re-evaluating its involvement in the project.</p>	<p>Still in pre-application phase.</p>	<p>Assessment (BBWA) on January 11, 2014, and is currently developing "Proposed Determination" under Section 404 (c).</p> <p>On April 29, 2014, EPA received letter from the Pebble Limited Partnership to the Alaska Attorney General in response to our February 28 information request under Clean Water Act Section 404(c). EPA is reviewing their submission information thoroughly before determining whether to move forward with an action to protect Bristol Bay fisheries resources.</p> <p>Information is available at http://www2.epa.gov/bristolbay.</p> <p>On January 9, 2014, PLP sent a letter to EPA's Region 10 Inspector General challenging the substance and validity of the BBWA and requesting an investigation relating to bias. The Corps initiated an investigation.</p> <p>The Corps of Engineers drafted a letter to the project proponents advising that their proposed functional analysis for streams, wetlands, and marine waters are inadequate and will require adaptation/revision through the efforts of an interagency working group. Interagency working group is engaged.</p>

Project Title: Usibelli Jumbo Dome Mine

Lead Federal Agency: ACOE

Responsible Person: **(1)** State Lead: Large Mine Project Team, **(2)** DEC Lead: Tim Pilon (WW), **(3)** DMLW Lead: Russ Kirkham, **(4)** EPA Lead: Gayle Martin (404), **(5)** Corps: Ben Soiseth

<p>The Usibelli Coal Mine is located near Healy and is expanding through the acquisition of state leases in an area known as Jumbo Dome. The coal is sub-bituminous C with very low sulfur content.</p> <p>Formal Surface Mining Control and Reclamation Act (SMCRA) permit has been submitted to DNR coal section for review. Permit application is currently undergoing completeness review. DEC is evaluating mine water management options. ADF&G is working with the applicant on Title 16 fish passage permits.</p> <p>DEC staff met with Usibelli Coal Mine staff to discuss coverage under the Multi-Sector General Permit (MSGP). Usibelli claims the mine will have zero discharge and does not need coverage under the MSGP. DEC disagrees.</p>		<p>The Corps verified use of NWP 21 for the haul road portion of the project in December 2010 and for Term 1 of the mine plan in February 2012. NWP 21 was reissued in March 2012, and was reissued with a limit of 0.5 acres. Nonetheless, a grandfathered provision of the reissuance allowed surface coal mining activities that had been previously verified by the NWP 21 to be reauthorized without applying the new requirements imposed on the reissued NWP 21 with re-verification by the Corps. The Corps re-verified Usibelli's use of NWP 21 for the haul road and Term 1 of the mine on December 21, 2016, with an expiration date of March 18, 2017.</p>

Project Title: Usibelli Wishbone Hill Mine

Lead Federal Agency:

Responsible Person: (1) DEC Lead: Allan Nakanishi (WW), (2) DNR Lead: Russ Kirkham, (3)

EPA Lead: Cindi Godsey (WW), (4) Tami Fordham (Tribal), (5) Corps Lead: TBD

Usibelli is seeking permits from the state in order to mine coal from 800 acres near Palmer and Sutton in the Matanuska Valley. Project is located on State Mental Health Trust and private lands. The mine would produce up to 500,000 tons of coal per year for 12 years. There is local concern about potential impacts from fugitive dust. The Native Village of Chickaloon has also voiced concern about potential impacts to drinking water, surface and groundwater, subsistence foods, and religious and cultural practices. Usibelli applied in a timely manner for a 5-year renewal of the Surface Mining permit that was set to expire in November, 2011. The original deadline for public comment on the permit renewal was October 14, but was extended to November 15 at the request of the local community. The DEC Air Quality Division was working with Usibelli on an air quality minor permit, but Usibelli withdrew the permit application in mid-October. Usibelli has since refiled its Air Quality permit application. A request for a detailed health impact assessment (HIA) was submitted to the Dept. of Health & Social Services on June 13 after the department had completed a "draft rapid assessment". A similar request was attempted to be submitted through the Mat/Su Borough Assembly, but that request was denied	Air Permit (State) APDES Permit	404 Permit trigger NEPA

MINING PROJECTS

Description & Link	Schedule	Federal
--------------------	----------	---------

Project Title: Niblack Project

Lead Federal Agency: TBD

Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator: Kyle Moselle, (2) DEC Leads: Renee Evans (WW), (3) Doug Buteyn (SW), (4) DFG Lead: Mark Minillo, (5) EPA Lead: Cindi Godsey, (6) Corps Lead: Nicole Hayes, (7) USFS Lead: Sarah Samuelson

<p>The Niblack Project is a copper-gold-silver-zinc prospect located on Prince of Wales Island southwest of Ketchikan. The proponent is Heatherdale Resources, a Hunter-Dickinson group company (HDI is also parent of Northern Dynasty). The Project is in an advanced exploration phase, including approval for up to 6,000 feet of underground tunneling and 25,000 feet of underground drilling. Niblack holds 6,200 acres of federal and state mineral claims and 250 acres of patented (private) land. All current disturbances are on patented land, but some surface exploration has occurred within the adjacent Inventoried Roadless Areas of the Tongass National Forest. DNR and the Forest Service approved additional geotechnical and exploration drilling in 2012, which the company conducted. However, the site has been in a temporary closure since Oct. 2012.</p> <p>Development proposals may include off-site processing of ore (two sites in Ketchikan are being considered). Power at the mine site could eventually come from hydroelectric resources.</p>	<p>Pre-application phase, advanced exploration</p> <p>Project is in temporary closure under existing WMP. Temporary closure expires Oct 2015. Further exploration activities pending funding.</p> <p>Nilback has proposed a marine discharge of existing contact water. Nilback is considering a proposal to modify the WMP to cap existing PAG material in place rather than move back underground, but no application has been submitted yet.</p>	<p>USFS approved surface exploration drilling in 2001</p> <p>Inventoried Roadless Area #507 on June 7, 2012.</p>

MINING PROJECTS

Description & Link	Schedule	Federal
<p>Project Title: Rock Creek Mine [now Nanuuq Project under Bering Straits Native Corporation (BSNC)]</p> <p>Lead Federal Agency:</p> <p>Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator: Jack DiMarchi, (2) DEC Leads: Tim Pilon (WW), (3) Doug Buteyn (SW), (4) DNR lead: Brent Martellaro (5) ADF&G Lead: Laura Jacobs, (6) EPA Leads: Cindi Godsey, (7) Thor Cutler (UIC), (8) Corps Lead: Mike Holley (9) Lead for BSNC: Consultant Frank Bergstrom, (10) Harry Noah</p> <p>Consists of open-pit gold mines: Rock Creek Mine located six miles north of Nome and Big Hurrah Mine located 42 miles east of Nome. NovaGold transferred its subsidiary, Alaska Gold Co., which owns the project to Berings Straits Native Corp. on Nov 1, 2012. Big Hurrah Mine located on land owned by Alaska Gold Co. and surrounding lands owned by Salomon Native Corporation.</p> <p>A reclamation & closure plan was approved in Feb, 2012.</p> <p>The State signed off on the Phase I reclamation and responsibility for Phase II transferred with Alaska Gold Co. to Bering Straits Native Corp (BSNC) on Nov 1 and \$6.8 million of the \$20.3 million financial assurances were released. The remainder remained with Alaska Gold Co. when it was transferred to BSNC.</p> <p>DNR/MLW will require new personal bond and eventually updates to the Reclamation plan to reflect Phase I completion. DEC Waste Mgmt Permit will expire and new monitoring plan will be required.</p>		
	<p>AGC & financial assurances transferred Nov 1 to BSNC. State inspection of Phase I close was completed. Dam Safety has issued letter removing breached dam from state jurisdiction in August 2012.</p> <p>NovaGold submitted a final annual report on the project in March, 2013.</p> <p>BSNC continues to provide quarterly monitoring reports required by the permits.</p> <p>As of July 2013, no further efforts for at least a year for resumed mining of Rock Creek/Big Harrah under so-called Nanuuq Gold project based on financial and ore delineation issues.</p>	

MINING PROJECTS

Description & Link	Schedule	Federal
--------------------	----------	---------

Project Title: Kensington Gold Mine

Lead Federal Agency: USFS

Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator: Kyle Moselle (2) DEC Leads: Pete McGee (WW), (3) Doug Buteyn (SW), (4) DFG Lead: Kate Kanouse, (5) USFS Lead: Sarah Samuelson, (6) EPA Lead: Cindi Godsey, (7) Corps Lead: Randy Vigil

Gold mine operated by Coeur Alaska located 45 miles north of Juneau. Began production in June 2010 and expect to produce 125,000 ounces of gold per year.		
---	--	--

Project Title: Nixon Fork Mine

Lead Federal Agency: BLM

Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator: Jack DiMarchi, (2) DEC Leads: Tim Pilon (WW), (3) Lori Aldrich (EH/Solid Waste), (4) BLM leads: James Whitlock (compliance), (5) Alan Bittner (ANC Field Mgr), (6) EPA Lead: Cindi Godsey, (6) Fire River Gold: Blane Wilson (Gen. Mgr), (7) Larry Wilson (Env)

Consists of an underground gold mine located 32 miles northeast of McGrath. Located in an area of historic mining. Operator is Fire River Gold. Mine resumed production July 4, 2011 and made progress in improving project economics but the mine closed again in Fall 2013.	Current schedule is driven by completion/approval of the Temporary Closure Plan. The last State comments were sent to the company on Nov 18, 2013 – awaiting updated draft of plan. This should be the final draft.	BLM is a close participant in the closure approval process – If FRG adopts the latest changes to their temporary closure plan then the BLM will approve it concomittant with the State approving the same plan.	Final Plan 2014 on si Upda put c is in

Project Title: Bokan Mountain/Dotson Ridge REE

Lead Federal Agency: USFS

Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator: Kyle Moselle, (2) DEC Lead: Allan Nakanishi (WW), (3) DFG Lead: Mark Minillo, (4) USFS Lead: Sarah Samuelson, (5) EPA Lead: TBD, (6) Corps Lead: Nicole Hayes

The Bokan-Dotson Ridge Rare Earth Element (REE) prospect is located on the southern end of Prince of Wales Island, approximately 37 miles southwest of Ketchikan. The proponent is Ucore Rare Metals, Inc, and the property consists of approximately 10,000		Plan of Operation for geotechnical drilling approved by the USFS July 8, 2013.
--	--	--

MINING PROJECTS

Description & Link	Schedule	Federal
acres of federal mining claims on the Tongass National Forest. The REE resource is primarily contained in narrow dikes, but with good grade and high heavy/light REE ration. The Bokan-Dotson Ridge REE Project area is located along Dotson Ridge adjacent to Bokan Mountain (site of the historic Ross Adams uranium mine, last operated by Newmont Mining Corporation).		Ucore plans to complete that work in 2014 (pending funding).

Project Title: Free Gold Golden Summit

Lead Federal Agency:

Responsible Person: (1) State Lead: Large Mine Projects Team; OPMP Coordinator:

Project in the Fairbanks area, exploration has occurred for several years
